Cornell University, Ithaca NY - Information Systems and Technology, *2005 - 2008*

Personal Projects

ObiPix Design Platform - https://obipix.com
- Dynamic image generator that uses HTML5, CSS3, Javascript, and PHP to generate unique images and filters.
- Launched app in 2015 and still maintained. App has over 100 unique image-creating algorithms/patterns.
- Added features like original photo-filters, designer-palette generator, and an illustrator palette generator.

Sion API - https://sionapi.com
- A free analytics REST API offering various endpoints. Frontend made in React, backend in PHP.

color22 - https://color22.com
- A multi-purpose color picking and discovery tool. Created in React, Javascript, HTML5, CSS3.

Coloressa - https://coloressa.com
- Created this design tool to help designers discover colors, hues, and shades. Javascript, HTML5, and CSS3.

NGplaylist - https://ngplaylist.com
- Music Social network with full CRUD functionality using HTML5, CSS3, PHP, Bootstrap, SQL.
- Implemented authentication with sign up / log in / log out functions using hashing and salting.

Other projects: **BibleImg** - https://bibleimg.com, **BibleByTopic** - https://biblebytopic.com
